solutions that work for your business.

COST EFFECTIVE AND PROFESSIONAL

Regardless of industry and regulations no two businesses are alike. We understand this principle and provide answers based on your business and operations.

Taino Consultants Inc. (TC Inc.) was founded in May 1995 with the goal of assisting healthcare professionals with their business challenges (contracting, logistical support, human resources, marketing and compliance). As the clients' trust and needs expanded the company evolved to include information technology services, government organizations and businesses beyond the healthcare arena.

flexible solutions for your business needs

GOVERNMENT PROCUREMENT

Dr. Delgado served as a contracting officer for the United States Air Force before he founded Taino Consultants, Inc. He understands the procurement process, the military mind and the challenges of the job. He also brings to the company expertise in commodities and overseas contracting in support of units working away from their normal lines of support.

DOCUMENT SOLUTIONS

Our Document solutions department specializes in the conversion of data from one format to another. We offer a variety of services including document imaging, microfilm scanning and conversion, plotting and computer aided drafting (CAD). Through our own proprietary software we offer our clients virtual solutions and a secured, worldwide accessible document management system.

CUSTOM SOLUTIONS

Let us look at your organization and after an initial review we will recommend the solution that best works for you.

WEB SOLUTIONS

Security, flexibility and accountability are the key words of our solutions. We used HIPAA security and military guidelines used to manage top secret documents to develop a platform that is both flexible and secure.

BUSINESS SOLUTIONS

Our solutions are based on your operations with the idea of improving their efficiency and reducing costs. We also assist with the creation of new businesses/lines of production and compliance issues for our customers.
